The visitors were a heavy outfit and when under way endeavored to make a dent in the home lightweight. The method of cutting swaths early in the game put the Norway quintet wise to mode of procedure if the goal was to be reached. The home bunch were equal to the occasion and went after the ball with speed and accuracy which surprised not only the M. C. I. players, but a large crowd who had assembled to watch the

As the second period opened a convincing argument was sent out by the visitors that they expected to overcome the lead. Roughness commenced and the home bunch met the charge valiantly. Referee Austin jumped right into the game and followed every play closely. Fouls were called repeatedly on both teams, yet it placed no brake on the headlong race. The contest was a

Norway came eight times under the ban and White caged four as his share from the sentence. Purington was everywhere and proved his worth at tackling. He blocked several plays which were on the direct road to the station named "points." True did clever basket shooting and was prominent in other departments.

The greater menace however is frozen mains and hydrants. Several streets are entirely cut off and it is almost a gamble where the blow will strike next. Everywhere possible is being done by the local water company to keep the pipes open. GUARANTEED**Woman Suffered in Silence**Health Poor, Beauty Fast Fading Away—
Made Believe She was Well

A business woman writes: "There must be lots of women who feel as I did. I suffered in silence many times on account of my pride, but now I know that a good laxative is essential to good health. I neglected my health trying to keep cheery and pretending I was all right when I wasn't. I had terrible pains, was 'grouchy' and my headaches almost killed me with pain, and worst of all from my viewpoint I had a sallow, unbecoming complexion which was not helped by face powders. Why didn't I try to cure myself rather than pretend? After taking Dr. True's Elixir, I now know that a laxative was what I needed. Dr. True's Elixir is mild and pleasant to take, and works just right for me. My complexion cleared up—bright and ruddy—blemishes vanished and every one remarked how much better I looked."

—Mrs. E. J. B., New Auburn, Me.

The root of many of the evils of sickness is the bowels, a very vital part of the human body.

A cold, a fever, diseases of the like can be remedied at once, providing the operation of the bowels is normal—the first and most important relief can be had by giving a Laxative, but be sure it is the proper kind.

Most everybody in these days of quick action and strife, forget their health. The laboring people bolt down their meals, often go to bed right after eating, and wake up in the morning restless, force down a breakfast and then are distressed all day.

An Outdoor Worker says: "I could not puzzle out what made me feel so

bad. My good, home-cooked meals didn't even taste good, and I had headaches and was grouchy. I never thought it was constipation, but now I know, for I took four little doses of your Dr. True's Elixir and it fixed me up grand. I will never be without it again in case of constipation."—F. B. B., Allston, Mass.

The bowels need attention first and always. Rich foods, improper cooking, irregular and quick eating, lack of exercise can all be offset providing a mild laxative is taken regularly.

A Business Man Writes: "The continual rush of office details and the short meal hours I get, together with, I think, restaurant foods, has simply knocked my system all to pieces. I felt lousy, and had no appetite until I took Dr. True's Elixir, as a Laxative. It is a great thing. No one should neglect their bowels."

—Boston Business Man.

Dr. True's Elixir, the Family Laxative and Worm Expeller, with an established reputation since 1851 (over 68 years) has accomplished the seemingly impossible. It has relieved thousands upon thousands of sufferers from constipation, which causes so many terrible disorders.

Dr. True's Elixir will benefit every one: The laborer who eats heartily and quickly, the office boy or girl who eat "fancies" and irregularly; elderly people who can't digest well and children who suffer from intestinal parasites.

Dr. True's Elixir means a big saving to health and pocketbook. At all drug-gists. Three sizes, 40c, 60c, \$1.00. Buy the large size.

"No Rheumatics" is a Mighty Poor Reason for Wearing a Wooden Leg

NO sting or hot burnin' is a mighty weak-kneed recommendation for tobacco. But when tobacco is mild and cool, and yet as full of "fun" as a barrel of monkeys—well, that's another story—that's Velvet.

And 'cause why?

'Cause Velvet is brought up—not jerked up by the hair. It's raised as carefully as a favorite child. It's cured in the big fresh air. And it mellows away for two years in wooden hogsheads 'til it's smooth and rich as cream. The wonder would be if Velvet wasn't a whacking good pipe smoke.

"Let Nature mellow yo' tobacco an' that tobacco will shore mellow yo' nature," says Velvet Joe. And he's pretty nearly right.

NATURE-AGEING in the wood does more to make tobacco friendly than any camouflage you can cover it with—and don't you forget it. See, taste, smell, feel the "real tobaccoess" in Velvet. Why, you can almost hear it. Velvet's the tobacco you can judge with your eyes wide open and specs on.

There's a whole lot in Nature's way of making good tobacco better. And it's all in Velvet.

Here's to a full pipe and a friendly one.

WHY TELL A LIE?

Why must people go through life living and telling a perpetual lie? Why not tell the truth?

For instance:

If your neighbor is lazy, and his wife earns the living, and his children are hungry and half clothed, why not tell him so?

If you think public officials are inefficient and grafting, and misrepresenting their constituents, why not tell them so?

If Miss Pertness has her face smeared with powder, why wait for the wind to blow it off? Why not tell her she is a freak?

If you have been making love to your stenographer, and your wife suspects you, why lie about it? Why not tell the truth?

If you want your friend to endorse your note, and you know you can never pay, why not tell him so?

If Miss Dimple looks like a scarecrow, and you want to marry her for her money, why tell her she is a slyph, and an angel, and all of that rot? What's the matter with the truth?

If you are selling a spavined old horse, and you know it will fall to pieces before the purchaser can lead it home, why not tell him so?

If you owe the grocer, and the butcher, and the editor, and you never expect to pay them, why not tell them so when you place your next order?

If you drop a nickel in the collection box, and you expect to keep it, why not boost you into a choice seat in heaven, why hide your light under the cloak of modesty? Why not get up and tell the congregation so?

Isn't the truth good enough?

Try it.

The smile that won't come off is of little value to the world. It is founded upon nothing and is gauged by its origin.

He also spoke of words as aids to securing better and better positions in life. Then he told of the best way to learn new words. He advised the learning of a new word as it is used in a sentence. Finally he showed how new words might become one's own by using them on every possible occasion.

The Weight of Your Voice

Don't be backward about speaking a good word for this town, costs you nothing, and its value is beyond measure.

You may imagine that the weight of your individual voice is little avail, but you are wrong.

Every good word counts—as does every bad one.

Your individual opinion has great weight with some, and reasonable weight with others. There is no one upon whom it does not leave its impress.

When you point out the beauties and the advantages of this community, and the sterling qualities of its citizens, you stamp these facts upon the minds of those with whom you converse, and they in turn transmit them to others.

In this way the good work becomes an endless chain, always traveling, always boosting, always beckoning to the stranger to come where good words and deeds abound, and where ill ones are seldom heard or seen.

Every voice has its weight, and yours is not the least of all.

Maud Murch has lost her glasses.

Whereabouts last known leads to the surprise that they were fed to the hens.

Rumford is a progressive town and sensible in something. It closes its fiscal year Dec. 31. A committee of 15 goes over the appropriations for the coming year January 10th and the printer has four weeks in which to print their report. Closing account then conforms to the report of State officials in making reports to them. It is as it should be in every large town.

Spaulding Abbott, who is hauling pine for Levi Richardson, Crockett ridge, just escaped a serious accident Monday while loading pine on the mountain. The load slipped and threw one of the oxen onto a tree, inflicting quite serious injury. Mr. Abbott jumped to safety, but the steer, which is one of a fine pair, will be laid up for several weeks.

SCARE UP A SMILE

The world is dark and gloomy, and times are foreboding, we know.

But what of it?

Brooding will not cure it, but cheerfulness may help.

Scare up a smile—dig up a laugh—hand out a word or two of good cheer. Christmas will soon be here, and all the world should rejoice in the mere fact that we are living.

NORWAY, : : : : MAINE

There is a curious fallacy that promiscuous buyers are guilty of, because it is "put money into circulation." It is no fallacy at all that the rapid circulation of money promotes prosperity.

The former is simply an argument in favor of extravagance. The latter is an argument in favor of economy.

It depends upon what you buy. If you use your savings to purchase a steam pleasure yacht that you do not want and cannot afford, you are not really helping it. Keep the factory wheels revolving. You are diverting industry into the vicious activity of manufacturing useless things.

But if you put your money into bonds for the development of staple industries and into promoting prosperity. Your money immediately helps workmen, pays them wages, and they in turn produce necessary commodities.

It is fairly simple. Yet millions of our countrymen are buying extravagantly, and defending themselves by the claim that they are saving for construction.

Day laborers are buying \$100 dollar pairs of shoes, when five or six dollar shoes would look as well and wear as well. And multimillionaires, it has lately been learned, are making the same mistake. They are buying them repeatedly required.

Story: An Irishman was in a poker game and drew one card. "What did you draw?" a friend asked him after the play. "A spade," answered the Irishman. "I knew it was," said the friend, "as I saw you spit on your hands."

A third study is to determine the variation of milk yield and butter-fat percentage for the different breeds. The investigations under this head are of a fundamental nature. When the Maine Station undertook its studies of milk yield, it was so general in its scope that the object that many facts of a somewhat elementary nature had to be determined. These were already ascertained and published are:—the law expressing the relation of milk flow and butter-fat percentage; the law expressing the relation placed upon one lactation record as a measure of the probable milk yield of another lactation; and the relative value of the short time test as a measure of a cow's producing capacities.

It is in dealing for or against a breed to ascertain the relation which may exist between conformation and milk yield. The conformation of body parts is assumed to have a relation to milk yield and is possibly used more than any other factor in deciding for or against a cow, little or no investigation of the real significance of these points has been made. It is the purpose of this phase of the animal husbandry investigations determine by analyzing score cards, records, and other data, the relative value of points used in conformation for predicting milk yield.

The purpose of this brief outline is to make clear that however technical studies they have only one ultimate purpose, to determine the value of a favorable balance sheet for the Maine dairyman.

For sale, cheap—A perfectly good pair of cow shoes. Leather is too expensive for their relation.

IT is said that the devil always claims his own.

But there are times, we fear, when the devil would hesitate to claim certain undesirable specimens of humanity, gurgling in the guise of fair men.

Out at Fort Sheridan, Illinois, are a large number of maimed and broken heroes who fought in the world war and have home nothing but battered wrecks. Some have no legs, or no arms, and others are maimed in various ways.

About 25 of these heroic but helpless men were invited recently to attend a social in Chicago which was largely endorsed by the women of high society.

Some of these women protested against the presence of the crippled soldiers who were given their seats.

On the ground that the idoloform with which their wounds were dressed was distasteful to their aesthetic sense of smell, they even went so far as to write letters of protest to the lady who gave the musicale and invited the veterans.

Did the devil smile? He did not! He hung his head in shame—for even in all of his diabolical baseness and abominability, had not sunk so low as that.

DEMAND FOR POTATOES

Increased demands are coming to us for potatoes, from the larger city markets, the port of New York and Chicago from whence the great amount of potatoes is rapidly disappearing. Much of the stock is spoiling because of rot. This situation has increased demand for Maine grown potatoes, the farmers expecting an upgrade slide.

They expect to start now on a good hold firmly for a week and a half. Indications of top figures before spring. There have been shipped from Maine during the season about 17,000 cars of potatoes and much more yet to go as

FIRE IN OXFORD PAPER MILL

The fire alarm which sounded at 4 a. m. Monday morning for a fire in the wood room which caught by the chippers at the Oxford Paper mill at Rumford. At eight minutes after four a second alarm was given. The auto fire truck responded without any trouble in spite of the snow and cold. The weather was 27 below and with the water freezing as soon as it struck it was indeed hard fighting the fire.

The flames extended from the wood room up the long trestle leading to the big brick building and this was the most dangerous place for the men to work, but the firemen succeeded in stopping the fire from communicating further. A portion of the hose is now frozen under a foot of ice, awaiting softening weather. As near as can be estimated the loss will be \$25,000 or more, covered by insurance. The two pulp mills will be shut down for a week or ten days. Cause of fire has not been determined yet, but thought might be from some of the machinery.

Albany Line

Albion L. McKee
The friends of Albion L. McKee, familiarly known as Dade, were surprised by pneumonia early Monday morning. He will be greatly missed by all who knew him. He was the soul of integrity and a kind friend or neighbor. Particulars of the sad affair later. Mrs. C. B. McKee has a sister who will stay with his wife while Mrs. Bessie Smith came home the night before he passed away. From Lewiston, where she is in training. Olive Wardwell was on duty as his nurse. Everything was done that could be done by loving hands, to alleviate his sufferings, but a higher call came of which he could not obey.

Mr. McKee was at the village Thursday and took a sudden cold which developed into double pneumonia. He was born at Stonham 30 years ago, the son of Charles P. and Sarah E. Stearns McKee.

He passed his early years there and moved sometime since to a farm in Albany adjoining the Norway Mining. For several years he had done considerable teaming from that vicinity to Norway depot and was well known here. His parents, his wife, who was Flora L. Wheeler of Albany, and a young son survive him.

Services were held Thursday afternoon in the church at East Stonham, conducted by Rev. C. N. Eliopoulos of North Waterford. Burial in Hillsdale Cemetery, East Stonham.

George Bean is working for Wm. Fisk and has hired out for the season we understand.

We read much about the scarcity of water, caused by the severe cold weather, but a rain or thaw for the winter should be a relief.

The situation in reading of someone in a far distant city being without water, but when it comes so near home and we hear as we have heard today that L. E. McIntire & Son, one of our largest and most prosperous farmers with over fifty head of cattle and several horses are without water, we begin to realize something of the situation around us and count our blessings.

WEST BETHEL

Wellington R. Chandler

Wellington R. Chandler, for nearly thirty years of East Bethel, formerly of West Bethel, died January 29th at the age of 56 years and 7 months. He had been failing in health for about three years, but worked up to five days before his death. He was the son of the late Moses R. Chandler.

The funeral was held from his late residence, Sunday afternoon.

Funeral services were held at the home of his parents Saturday afternoon, Jan. 31st, and the body placed in the tomb at East Rumford until spring, when it will be buried in the cemetery at Abbott's Mills beside that of his only brother, Charlie Elliott, who died five years ago.

South Paris

(Continued from page 1)

George H. Burgess
After a long period of failing health George Henry Burgess passed away at his home on Elm Hill, South Paris, Jan. 27. His age was 78 years, 8 months, 23 days.

Mr. Burgess was born in Rumford and moved to Norway in 1861, where he worked at his trade as a shoemaker and custom shoe maker with Mixer & Watkins, later he was employed by Mr. Hawkins in his repairing department.

He married Melvina Crooker of Norway and commenced keeping house in the village. Some twenty years ago he bought the Churchill farm on Elm Hill and divided his time between tilling the soil and making shoes in the B. P. Spinnery factory.

Mrs. Burgess passed away ten years ago and her sister, Mercy Crooker has cared for the home since. Although physically handicapped he was industrious and until failing health caused him to give up hard work, the Burgess farm was considered one of the most productive in this section.

Two daughters and a son were born. Isabel, wife of the late Fred A. Given, died nearly three years ago; Grace Burgess has been employed at Feltner's in Boston until her return about a year ago to assist in the care of her father, and Oscar Burgess, a steamboat engineer now detained in Cuba because of a strike.

Beside the son and daughter he leaves a brother, Maurice, who lives at Wayne and a nephew, Horace Given, who is in Cuba with Oscar Burgess.

Services were conducted at the home Friday afternoon by Rev. C. G. Miller. By a strange coincidence Rev. Mr. Miller conducted the funeral services of Mrs. Burgess and the services of Fred A. Given. Three months later he was called to attend the funeral of Mrs. Given. Burial at Pine Grove Cemetery.

WANTED: CORNER FOR THE CHILDREN

We recently received the following letter:

"Dear Editor:—Goodness! aren't you ever going to run the Children's Column in the Advertiser? Your paper is daily but there isn't a thing in it to interest the children at all."

How delighted the little folks would be if there was a column for just their own selves in the Advertiser every week!

A short story or some funny jokes or something of that sort would make the youngsters look forward to reading the paper.

The children of today are the men and women of tomorrow and if they enjoy reading your paper when they are little, they will stick by it when they grow up. Please the little ones.—J. J.

If the children really want a column, they can have it, if they care enough for it to occasionally write letters for it or send in interesting little stories for the column. Children, do you want the column? Will you do your part? We will try to do ours.

The following letters will be of interest to you:
